How to Clean Black Mould and Stains from Grouting and Sealants

INGREDIENTS

For the spray	For the stubborn stains
Glass bottle with spray attachment	2-3 tbs bicarb
150ml water	Old toothbrush (soft bristles)
60ml white vinegar	
40ml surgical spirit	
20 drops organic lemon essential oil	

METHOD

Mix up the spray ingredients in the glass bottle and spray on affected areas. Leave to soak for 15 minutes then wipe off the mould.

Then dip a dampened old toothbrush into the bicarb and gently remove any stubborn mould remaining.

INFO

The vinegar will kill the mould and help prevent further outbreaks and dissolve limescale build-up.

The surgical spirit will help to kill germs and bacteria.

The lemon essential oil will make this solution smell great and has antiseptic and germ-killing properties.
